

Switches & Breakers

The background is a green-tinted collage of Hitachi electrical products and technical drawings. It includes several large-scale technical line drawings of switch and breaker components, showing internal parts like coil terminals, main terminals, auxiliaries, and trip mechanisms. Overlaid on these drawings are three physical product images: a small circuit breaker labeled 'FXK250-H 3P', a larger one labeled '250A', and a complex control unit labeled 'HITACHI AIR CIRCUIT BREAKER'. In the bottom left corner, there's a detailed exploded view diagram of a switch mechanism with labels for its various components: 'Button for reset and change of reset methods', 'Test trip lever', 'Trip indicator', 'N.C. moving contact', 'N.C. fixed contact', 'Line side terminal', 'Load terminal', 'Heater', 'Bimetal', 'Temperature compensating bimetal', 'N.O. fixed contact', 'N.O. moving contact', 'Current adjust knob', and 'Trip bar'.

HS series - New ELECTROMAGNETIC CONTACTORS AND SWITCHES

▼ FEATURES OF NEW ELECTROMAGNETIC CONTACTORS AND SWITCHES (HS series)

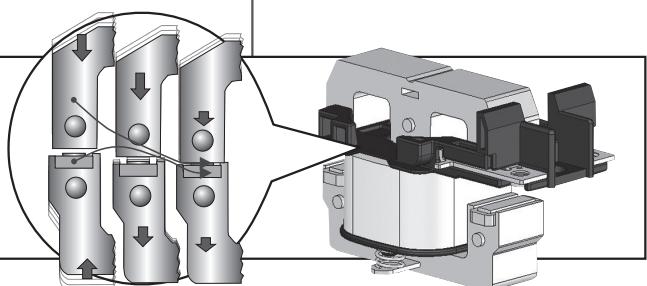

ELECTROMAGNET RESISTANT TO VOLTAGE FLUCTUATIONS

The contactor maintains stable conducting performance even when the power supply voltage drops when started under load.

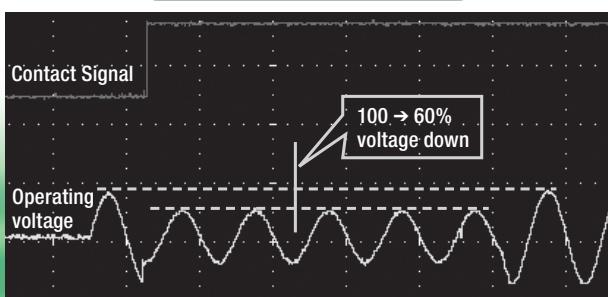

New shock-absorbing structure

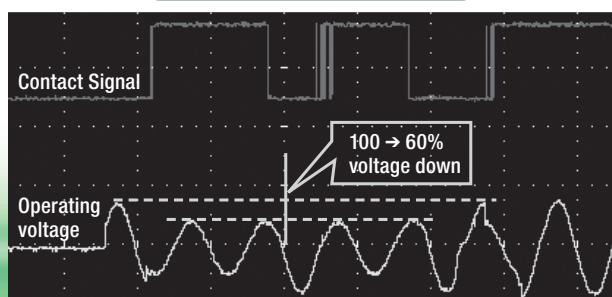

Immediately before collision, the movable core and the fixed core move in the same direction to absorb the shock.

Stable operation

During contact chattering

IMPROVED ENVIRONMENTAL PERFORMANCE

Reduced power consumption

The HS series reduces power consumption by operating coils with 20A to 50A frames.

Frame	20A	25A	35A	50A
Power consumption	86%	86%	95%	95%

(compared with conventional Hitachi IES products)

Amount of materials used reduced, recyclable materials increased

The HS series improves environmental performance through miniaturization to reduce product weight and with indications of material names for easier recycling.

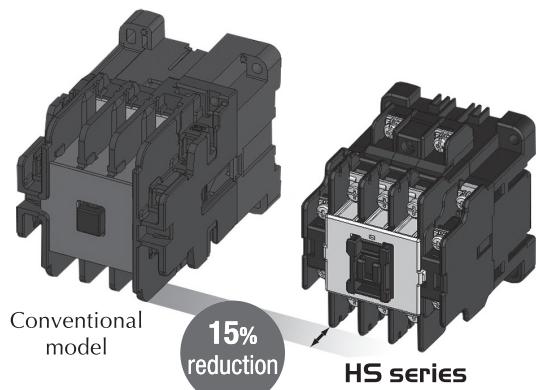

Example of
indication for resin used

IMPROVED USABILITY by Miniaturization and an Enhanced Auxiliary Contact Unit

15% height reduction

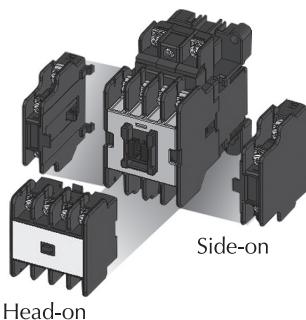

Improved magnet and contact efficiency greatly decreases the height from the mounting surface for 20A to 50A frames.

Improved inching performance

The capability of the 10A frame has been upgraded to 2.2 kW and that of the 20A frame to 3.7 kW.

220VAC, 50% inching rate 50%, 100,000-operation service life (AC-4)

Enhanced auxiliary contact unit

In addition to the side-on type, a head-on type is available, further improving usability.

You can easily mount the side-on type with one hand (patent pending).

IMPROVED RELIABILITY AND SAFETY

Minimum load to 20V 5mA on the auxiliary contact

The HS series uses a highly reliable twin contact to open or close the contact of a micro load circuit.

Mechanical durability of 8 million operations

The HS series uses a new shock absorbing structure to improve durability.

Safe contact opening

(the auxiliary b-contact is turned off during welding of the main contact)

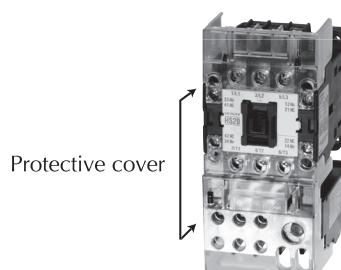

The HS series complies with the requirements for control functions for failures specified in EN60204 for electrical equipment of industrial machinery.

Fireproof materials used

Resin-molded parts use UL-approved fireproof materials to help improve system reliability.

Protective cover (option)

You can opt for a protective cover applicable to the IP20.

COMPLIES WITH VARIOUS INTERNATIONAL STANDARDS

The HS series either complies with or expects to comply with various domestic and international standards.

Note:

- The ratings of the 200V class in the parenthesis when frames 20 and 50 are provided with an enclosure.
- The rated thermal current applies to electromagnetic contactors.
- The pick-up and drop-out voltages apply to 200V 60Hz power source. In case of 50Hz, the figures for frame H65C-125C are about 10% smaller and for frame H150C-800C are about the same.
- Aplication of category AC3 and AC2 to the reversible electromagnetic contactors and switches shall be limited to regular reversible operation in which motor starts reverse rotation after it has once stopped. Category AC4 is applicable when the motor starts reverse rotation before it has completely stopped.

5. The mark ◎ in the application indicates that they standard.

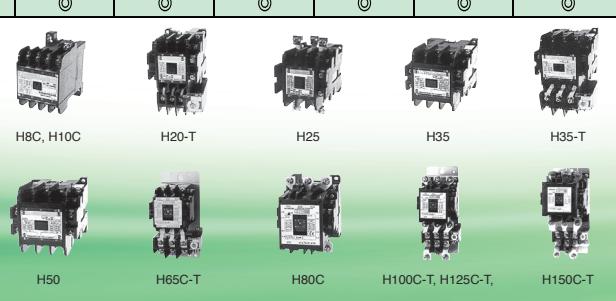

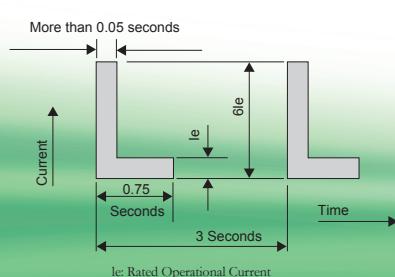

6. Operating time is a reference value where 200V 50Hz is applied to AC 200V coil. Operating time varies with coil voltage, frequency and phase so it is unsuitable for timing use.

7. Testing condition of electrical durability (Category AC3); The marking and breaking currents and operating frequency of the electrical durability are tested as shown in page 8 drawing according to test conditions of JIS C8201-4-1, IEM 1038 and IEC 60947-4-1

▼ **OPTIONS** Aux. Contact Block, Safety Cover and Mechanical Interlock Unit

HS series					
Item	Model	Configuration	Rating	Applicable model	Mounting
Auxiliary contact block	SXS-2	Contact configuration 1a1b	Rated operational current (AC15) 220V 3A 440V 1.5A Open thermoelectric current (I _{th}) 10A	XS4 HS8-50	Assemble the unit referring to the instruction manual that comes with the unit.
	SXH-2	Contact configuration 2a 1a1b 2b			
	SXH-4	Contact configuration 4a 3a1b 2a2b			
Coil surge absorber	CS-50	—	AC 250V Suppressed surge voltage: 600 V (peak) or less	XS4 HS8-50	Snap it into the groove of the case. L=0mm
Safety cover	TCS-10, TCS-10T	TC type	—	XS4, 8,10 frame	
	TCS-20, TCS-20T		—	20 frame	
	TCS-25, TCS-25T		—	25 frame	
	TCS-50, TCS-50T		—	35, 50 frame	
	CVS-10	CV type	—	XS4, 8,10 frame (non-reversible)	
	CVS-25		—	20, 25 frame	
	CVS-50		—	35, 50 frame	
	CVS-10R		—	10 frame (reversible)	
	FPS-S2	FP type	—	SXS-2	
	FPS-H2		—	SXH-2	
	FPS-H4		—	SXH-4	
Mechanical-Interlock unit	RI-50	—	—	10–50 (reversible)	Refer to the instruction manual.

H series					
Item	Model	Configuration	Rating	Applicable model	Mounting
Auxiliary contact block	AX-20	Contact configuration 1a1b	Rated operational current (AC15) 220V 2A 440V 1A Rated thermal current 10A	20, 25, 35, 50 frame	 Notes: Cannot be applied to the DC operated contactor (H-L-G).
	AX-65			65C frame	
	AX-80			80C, 100C, 125C, 150C, 200C, 250C, 300C, 400C frame	
Coil surge absorber	CS-8		AC 250V Suppressed surge voltage: 600 V (peak) or less	X3, X4, X5, X6, X8, 8C, 10B, 11, 12, 20, 25, 35, 50, 65C frame	 Snap it into the groove of the case. L=2–6mm
	CS-80			80C, 100C, 125C frame	
Coil drive unit	CX-20		—	20, 25, 35, 50 frame	Install CX-20 in the same way as AX-20. (above)
Safety cover	CV-8E			8C, 10C frame	 Example of CV-8E Bend the cover and insert it in the direction of the arrows to snap it into the main unit.
	CV-11E			11 frame	
	CV-20			20, 25 frame	
	CV-35			35, 50 frame	
	CV-65			65C frame	
	CV-80, CV-80T			80C, 100C, 125C frame	
	CV-150, CV-150T			150C frame	 Screw to the cover of the electromagnetic contactor. Dedicated tapping screws are provided.
	CV-200, CV-200T			200C, 250C frame	
	CV-300, CV-300T			300C, 400C frame	
	CV-600, CV-600T			600C, 800C frame	
	CV-T20B		Thermal overload relay 20B frame 50B frame 80B frame	Thermal overload relay 20B frame	Align the notch of the cover with the protrusion of the thermal overload relay and push it.
	CV-T50B			50B frame	
	CV-T80B			80B frame	
Reset release	RR-350		Dimension 350mm	Thermal overload relay 20B, 25B, 50B, 80B, 150B frame	Put the reset-release cap onto the current-adjustment knob of the thermal overload relay.
	RR-500		Dimension 500mm		
	RR-600		Dimension 600mm		
Mechanical-Interlock unit	RI-20		—	Reversible type of 20, 25, 35, 50 frame	 Snap the convex of the interlock unit into the concave of the electromagnetic contactor.
	RI-65		—	Reversible type of 65C frame	
Unit for installing the thermal overload relay solely	ST-12B		—	Thermal overload relay 12B frame	

MOLDED CASE CIRCUIT BREAKERS

— HITACHI FUSE-FREE BREAKERS —

New line-ups with fully integrated configuration, advanced performance and simplified operation

Reduced Total Costs Through Increased Efficiency in Specification Changes and Replacement

System configuration is integrated for each model type cassette loading system for interior accessories. Specification change and replacement are flexibly, easily executed. Leading-edge technology improves reliability and performance.

Flexibility — Cassette Type Accessories

The specifications of breakers can be changed by cassette type internal accessories. It can be installed by users. Quickly responding to changing specifications.

Capability — Improvement of Breaking Performance

Performance of short-circuit breaking has been developed for the requirement of IEC standard and we have just realized the performance $I_{cs}=I_{cu}$ ($I_{cs}=100\% I_{cu}$)

Compatibility — Unified Dimensions

Dimensions are unified for economical models and standard models *1, interrupt capacity is unified *2 , for the fuse-free breaker and earth leakage breaker to facilitate easy replacement.

*1 400, 600AF

*2 Within the frame for the same rated current

▼ Types and Models

Fuse-Free Breaker for General Purpose

Standard Breaker	Economical Breaker	High Interrupting Capacity Breaker

Full line-up & Compact

Up to 6300A, ACB provides fully lined-up 3 frame.
For each frame, there is just one size, which is smaller and more compact. It makes it possible for you to design the optimized volume panel.

MINIATURE CIRCUIT BREAKERS

▼ Types and Models

Miniature Circuit Breakers (MCB)	Residual Current Circuit Breakers (RCCB)
 BK63 series	 BTK63 series
 RK63 series	

Tripping characteristics

Type B

Instant tripping characteristics : 3~5In
Application : computers and electronic equipments

Type C

Instant tripping characteristics : 5~10In
Application : general load such as bulbs, motors

Type D

Instant tripping characteristics : 10~20In
Application : high current surge device
such as transformers, motors with heavy load

Approval

CE marking

CB Certificate

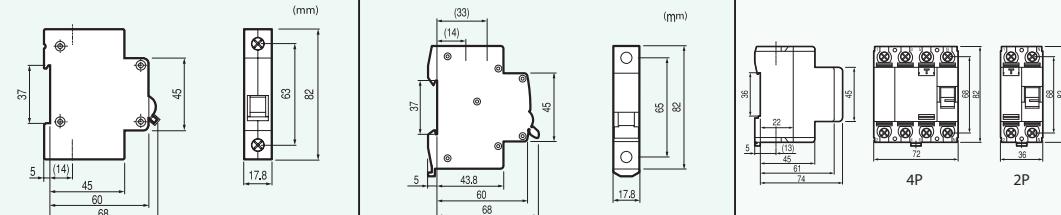

Colored handles

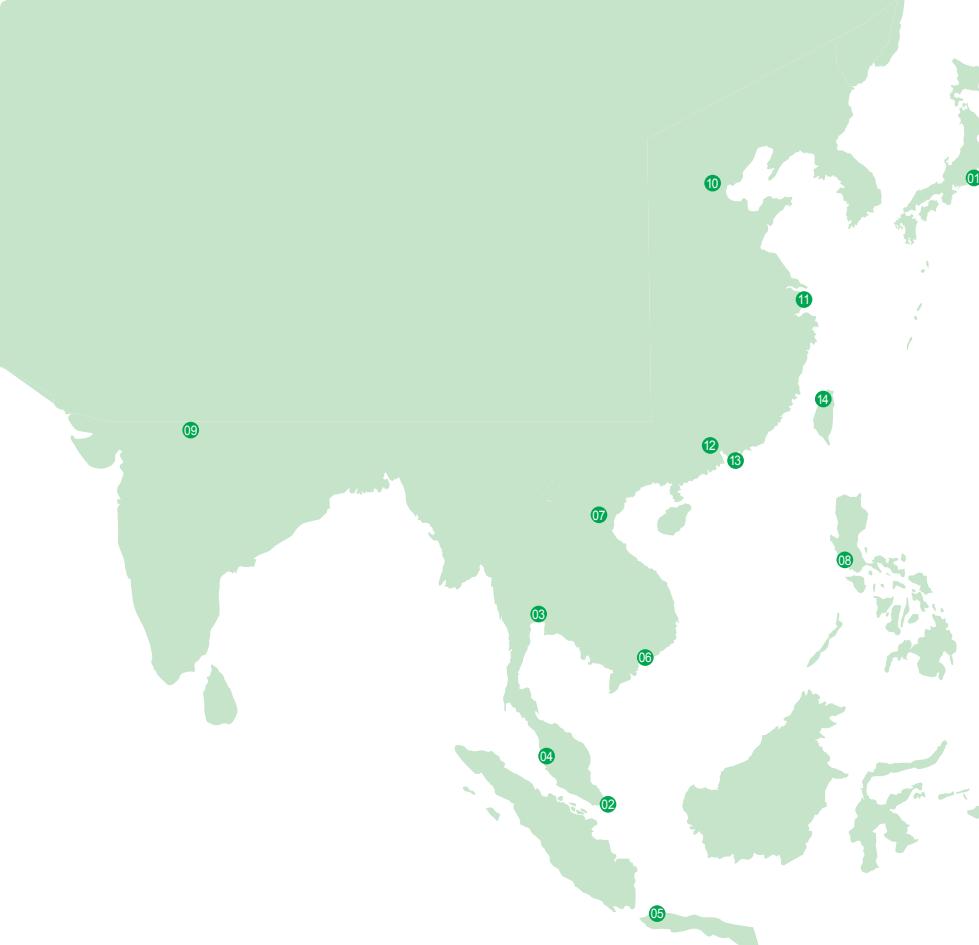

Easy to distinguish the rated current of the MCB
by means of colored handle.

1A	Black	20A	Blue
2A	Pink	25A	Yellow
3A	Pink	32A	Purple
4A	Brown	40A	Black
6A	Green	50A	White
10A	Red	63A	Copper-colored
16A	Grey		

(In case of RCCB, Black color only is available)

▼ Specifications

Type	BK63	BTK63	RK63
